

The results are in: A water-efficient workplace is within reach.

“A Water-Efficient Workplace”

The second of three
2010 Save Water Seminars

Our program:

Presentations by:

- ✓ Fred Hutchinson Cancer Research Center
- ✓ Seattle Steam
- ✓ King County Department of Health
- ✓ Seattle Public Utilities

Panel Discussion:

Hear from facilities managers and engineers who have had great success with water re-use and conservation projects.

Tour the Facility:

Jim Walker will lead a tour of Fred Hutch's cutting edge water-efficiency projects.

Water conservation is the way of the future. Innovations in water capture and re-use for your facility could:

- Make you a sustainability leader in the healthcare and research fields.
- Help your facility conserve potable water while making a difference in the community.
- Cut your water and wastewater bills.

Attend this seminar to:

- ✓ Learn the latest trends in water capture and re-use.
- ✓ Connect with pioneering colleagues.
- ✓ Get technical expertise and financial assistance for your projects.

When: October 13, 2010 | 8:00 a.m. to 2:00 p.m.

Where: Fred Hutchinson Cancer Research Center
1100 Fairview Avenue N.
Seattle, WA 98109

Who: Facilities Managers, Healthcare Engineers, & Laboratory Managers

Cost: FREE! Lunch and Snacks provided.

RSVP by Oct 4, 2010: kellyr@cascadiaconsulting.com
